Administrative System

WebWSIT is a powerful, convenient and easy to use web based e-learning, interactive training system that ...

- Trains your employees
- Tracks their progress
- Tests for knowledge retention
- Records their results
- Forecasts their training requirements
- Generates course certificates
- Provides a formal Due Diligence trail

Does your organization ever experience challenges determining who needs training and when or ensuring that training directives have been properly communicated?

WebWSIT has a unique automated notification system that ...

Advises Employees and/or Supervisors via e-mail of:

- Course Enrolments**
- Courses Not Started**
- Recertification Requirements**
- Courses Completed**
- Documents Posted**

Occurrence Tracking Module

Tracks ... Incidents/Accidents & Equipment Maintenance. Now you can systematically record and track incidents & accidents and incorporate appropriate remedial training into the report through the Learning Management System. The Equipment section can assist you to log and track equipment maintenance and link an equipment malfunction or misuse to an accident to help ensure proper performance and safety.

Document Centre

The Document Centre will allow you to post documents for your entire organization, a department, or specified individual group.
